Project: MMA Wharf

Client: Mermaid Marine

Contractor: Mermaid Marine

Year: 2008

Contract period: 12 months

Project scope:

Wharf extension for Mermaid Marine comprising 3300m² of wharf plus a pontoon for smaller vessels.

The wharf is designed for 3 *3,000t displacement vessels on the seaward side and 3*1,000t vessels on the landward side and a 250t crawler crane on the deck. The wharf was built working overhead with a 150t crane and piling frame. The piles are 660x16 steel tubes supporting 400mm precast concrete deck units with 250mm insitu concrete topping. Twin cone fenders and panels are braced back to the main structure. Services include lighting, power, diesel, water and firewater.

Roam scope:

Roam was responsible for project management including all aspects of engineering, procurement and construction of the wharf. Duties included approvals, budgets, progress reporting, subcontractor management, purchasing, scheduling, supply of temporary works, construction and quality documentation. Works were complete 2 months ahead of schedule and well below budget.
