Project: MMA Barge Berth

Client: Mermaid Marine

Contractor: Ertech

Year: 2008-9

Contract period: 6 months

Project scope:

Design, procurement and construction of a sheet piled barge berth to replace the existing heavily corroded barge berth at Mermaid Marine in Dampier. Works included demolition of existing structure, driving sheetpiles, drilling anchors, installation of concrete capping beam and slab, fenders, bollards and services.

Roam scope:

Roam was responsible for all concept development and detailed design with consultant Worley Parsons and MMA operations. Several alternative designs were developed and evaluated before choosing a sheetpiled option with drilled anchors and using the deck slab to tie back to the anchor wall. Roam was responsible for the procurement of fenders and painted sheet piles. Roam prepared budgets and tender package for the construction contract, however, were not involved with the Ertech construction contract management.
